Environmental Policy

The APS Industrial Services environmental policy establishes the principles of action for the organization. It sets the level of environmental responsibility and performance required of the organization, against which all subsequent actions will be judged. The policy should be appropriate to the environmental impacts of the APS Industrial Services activities, products and services (within the defined scope of the environmental management system)

The responsibility for setting environmental policy rests with APS Industrial Services top management. The environmental policy can be included in or linked with other policy documents of the APS Industrial Services. The APS Industrial Services management is responsible for implementing the policy and for providing input to the formulation and modification of the policy. The policy should be communicated to all persons working for or on behalf of APS Industrial Services. In addition, the policy should be made available to the public

In developing its environmental policy, APS Industrial Services has considered:

- a. Its mission, vision, core values and beliefs;
- b. Coordination with other organizational policies (e.g. quality, occupational health and safety);
- c. The requirements of, and communication with, interested parties;
- d. Guiding principles;
- e. Specific local or regional conditions;
- f. Its commitments to prevention of pollution and continual improvement;
- g. Its commitment to comply with legal requirements and other requirements to which the organization subscribes.

A handwritten signature in black ink, appearing to read 'David Murray', with a stylized flourish extending to the right.
